

**PRESS RELEASE**

## **ALICO LAUNCHES LATEST STRUCTURED INVESTMENT**

Alico Wealth Management announces the launch of the latest in a series of structured investments – the Controlled Opportunity Growth Structure 3 (COGS 3) – following the success of the previous COGS investments.

Structured funds are growing in popularity as investors seek to limit their downside risk. COGS 3 offers an ideal solution as clients are able to control the level of capital they expose to potential market falls, while also having the opportunity to benefit from any growth in the FTSE 100.

COGS 3 provides 11 different risk settings, ranging from full capital protection to a potential loss of capital on a one-to-one basis if the market falls, allowing clients to select an investment that is tailored to their individual circumstances. By choosing their risk setting, clients set their level of opportunity for growth, with the potential for the value of their investment to increase by up to 180% of any percentage rise in the market over a five year investment period.

This makes COGS 3 suitable for a wide range of investors, and therefore an attractive proposition for advisers catering to a diverse portfolio of clients. In addition to this, Alico guarantees the selected return, even if the assets default, thereby removing the counterparty risk normally associated with structured investments.

COGS 3 is available through all the products in Alico's Select Portfolio, with a gross version for clients investing in the Retirement Plan/ISA and a net version for Investment Bond/Advantage Investment Plan clients.

COGS 3 is available now, with the offer period for new investments closing on 24 September.

Further information on the Controlled Opportunity Growth Structure 3 is available at:
